Approved Upper-Level HM Elective	Free Elective

The Bachelor of Science in Healthcare Management (BS HM) at the Naveen Jindal School of Management is a 120 semester credit hour degree program that provides students a broad-based education in healthcare management. Become part of the next generation of leadership by entering the program which will prepare you by combining the strength of seasoned academic researchers and experienced practitioners in the field.

Healthcare management classes include a variety of disciplines that are relevant to business in healthcare such as marketing, supply side management, information technology, organizational behavior, management methods in decision-making, operations management, international business and strategic planning. Students will also select from elective healthcare-specific classes including human resources, hospital administration and classes that respond to a changing and dynamic healthcare environment.

Students are required to complete an internship prior to graduation. Fortunately, JSOM is located in a great metro area with 135 hospitals in Dallas-Fort Worth alone! And the Career Management Center (CMC) can help you to land a great internship. In addition, our active student Healthcare Management Association creates opportunities for networking and introductions to healthcare leaders throughout the region. Prominent DFW healthcare professionals regularly visit campus to share their industry experience and seek talented students.
