The Bachelor of Science in Supply Chain Management (BS SCM) at the Jindal School of Management is a 120 semester credit hour STEM degree program that is designed for students seeking to focus their business education by developing a working expertise and knowledge in the different elements of the supply chain. Upon completing the BS Supply Chain Management program, students have gained the knowledge, skills and applied research experience needed to help their future employers maximize efficiency and profitability.

Overall, the BS SCM program will provide students with:

- Solid understanding of supply chain management and effective practices.
- Skills for finding the resource that will give your company the best return on investment.
- Knowledge of innovative supply chain processes.
- Analytical techniques for assuring quality and delivery performance.
- Strategies for minimizing total costs of goods and services.
